

Mosaici

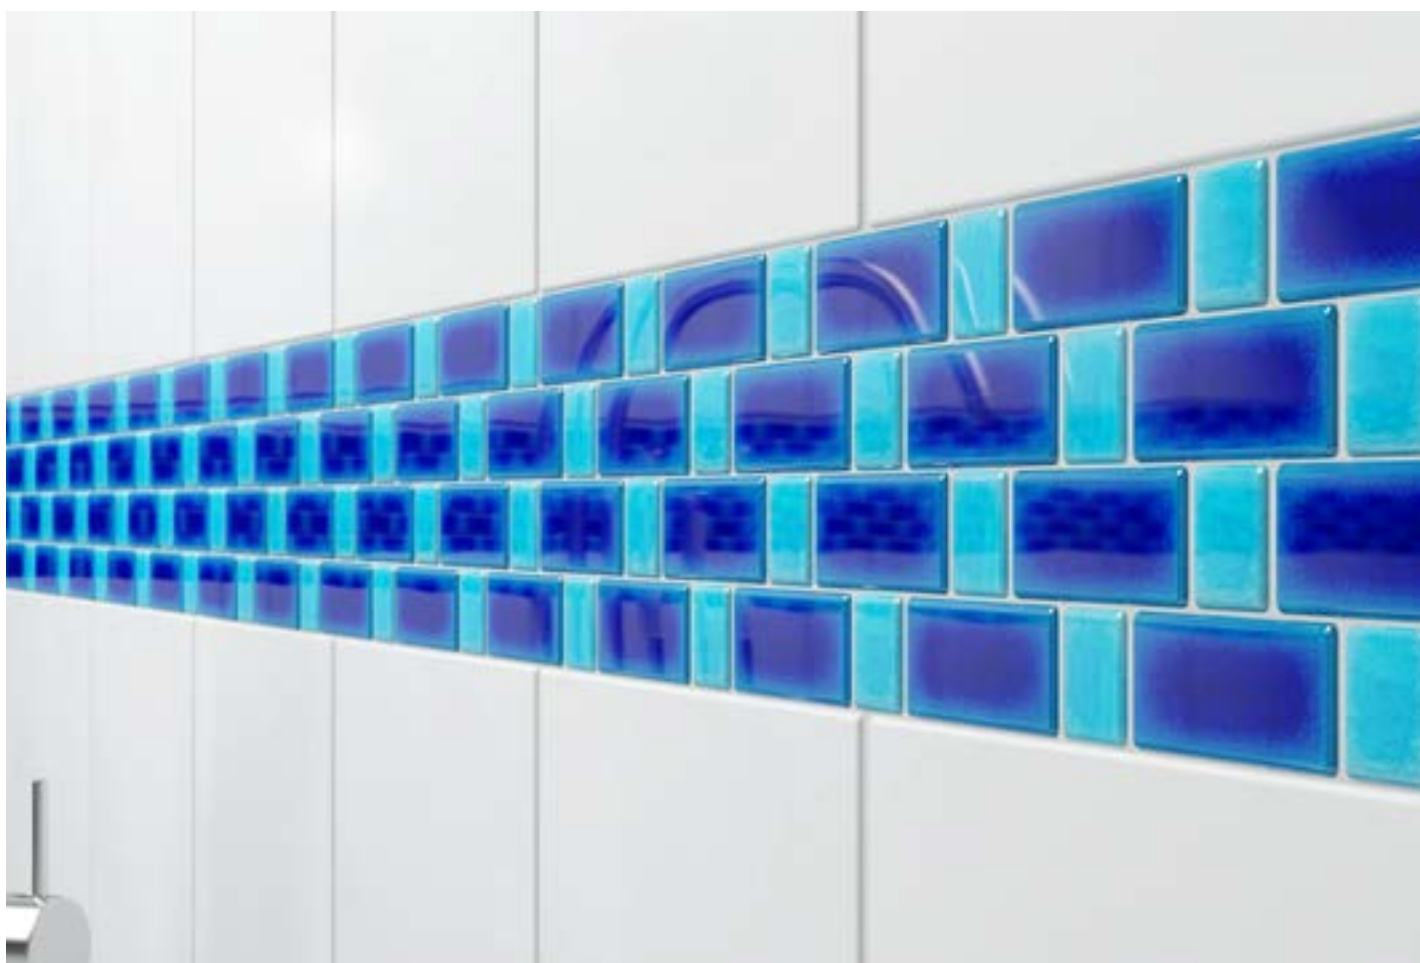

Il mosaico nella versione lapidea, lo troviamo già ai tempi degli egizi, dei greci e dei romani che poi, con l'opus tessellatum, hanno adornato le più belle ville delle nostre vicine Pompei ed Ercolano. Le tessere, le gemme e le formine di varia forgia che proponiamo in ceramica, sono una vasta gamma in cui miscelando le forme, i colori e gli smalti si ottengono rutilanti effetti, molto apprezzati anche per le superfici curve.

The mosaic, in its version on stone, could already be found in Egyptian, Greek and Roman times. With the opus tessellatum they adorned the most beautiful villas in our nearby Pompeii and Ercolanum. The tiles, the gems and the little shapes of different forge that are part of our wide ceramic range, allow to mix up shapes, colours and glazings with scintillating results that are veru much appreciated on curve surfaces.
